TavTech Ltd. is an innovator of unique, new, cost effective, patented technology, incorporating know-how from the aerospace industry in gas-dynamic supersonic flow and liquid atomization. The JetPeel system directs a stream of saturated micro droplets of natural components – (air and water) against the skin effecting a simultaneous action of oxygenation, hydration, and exfoliation of the treated area.

Thermage, Inc.

25881 Industrial Blvd.
Hayward, CA 94545-2991
(510) 782-2286 telephone (510) 782-2287 facsimile
www.thermage.com

Thermage manufactures the ThermaCool TC System, the only non-ablative technology that tightens tissue. The ThermaCool TC System is FDA cleared for the non-invasive treatment of periorbital wrinkles and rhytides. It uses an advanced form of capacitive radiofrequency to volumetrically heat and tighten tissue while protecting the epidermis with cooling cryogen spray.
