

## PRODUCT PROFILES

### NaturaLight

The NaturaLight is a new pulsed light system from Focus Medical. The NaturaLight is an excellent system for hair removal, skin rejuvenation and vascular/pigmented lesion treatments. The system is highly portable with high energy output. Energies of up to 35 J/cm<sup>2</sup> can be delivered at 1 Hz.

Focus Medical: 203-730-8885 or visit [www.focusmedical.com](http://www.focusmedical.com)

### LIGHTWAVE Systems

LIGHTWAVE provides effective, non-invasive solutions for cosmetic improvements of the entire body. Specific wavelengths of red (630 nm), infrared (880 nm) and blue (417 nm) are used to significantly reduce the appearance of fine lines, wrinkles, blemishes, facial discoloration, stretch marks and cellulite without thermal damage or other adverse affects. LIGHTWAVE is the only hands free system to utilize 15 unique pre-set programs to provide up to three independent treatments simultaneously, offering the largest coverage area available. LIGHTWAVE systems are designed for use in spas, medspas and medical offices. All systems are made in the USA. Complete LIGHTWAVE systems start at \$10,000.

### Pliaglis Cream

Pliaglis™ Cream contains the highest concentration of topical anesthetics approved by the FDA with lidocaine (7%) and tetracaine (7%). Pliaglis Cream reduces discomfort during superficial cosmetic procedures. Its unique formulation goes on as a cream and dries to an easily removed peel. This cream is well tolerated with a proven safety profile and has been studied in numerous clinical settings. The most common side effects include transient and mild redness, skin discolorations and swelling.

## PRODUCT PROFILES

### HT Filters

Glendale®/Sperian Protection, a worldwide leader in laser eyewear and patient eyecare introduces HT™ (high transmission) filters. These narrow band filters offer exceptional visual acuity of tissue and your environment while protecting against 803-830 nm lasers. The 800 series filter has a yellowish tint and visible light transmission of 72%, which is a 30% increase over present magenta tint filters. These filters are offered in our new XC spectacle featuring multi-material technology (MMT™). Every lens features an anti-fog and anti-scratch coating for clear vision and an Rx insert. The Glendale XC comes with a lifetime frame guarantee.

Glendale/Sperian: 800-500-4739 or visit  
[www.Glendalelaser.com](http://www.Glendalelaser.com)

### Clareon

Novalis Clareon – the only system with patented FDA approved Krypton pulsed light technology. Krypton pulsed light systems utilize the newest spectral distribution technology delivering increases in efficacy and far fewer side effects when compared to other systems. With an innovative unit designed to incorporate future technologies, there's no fear of obsolescence. Increase your range of services to include treatments for skin rejuvenation, sun damage, permanent hair reduction, leg and facial veins, acne and rosacea. Our risk free trials and financing assistance make owning yours easy. Call today to schedule an in-office demonstration and see for yourself what Krypton can do.

Novalis Medical: 866-627-4475 or visit [www.novalismedical.com](http://www.novalismedical.com)

### Whisper-ng

Sandstone Medical Technologies, LLC is the innovative company behind the Whisper-ng compact erbium laser system. The Whisper-ng reduces wrinkles, shrinks pore size and improves skin tone and texture. With little patient downtime, Whisper-ng treatments are safe, fast and painless and produce impressive results. The Whisper-ng is effective on skin types I -V.

[www.sandstonemedicaltechnologies.com](http://www.sandstonemedicaltechnologies.com)

**Tända Skincare System**

The Tända Skincare System is one of the first home-use medical devices that utilizes powerful LED technology, combined with micro-processor control and proprietary optics to deliver clinical levels of light. Tända CLEAR helps cure existing blemishes and prevent further outbreaks; Tända REGENERATE can help to rejuvenate the skin's appearance and diminish fine lines and wrinkles. The Tända Professional Skincare System is classified by the FDA as a physician directed product and available for home-use in the U.S. by prescription only.

**Pharos Life Corporation: 519-651-1177 or visit [www.tandaskincare.com](http://www.tandaskincare.com)**

**CellaDermRx**

CellaDermRx™ is an advanced supplement designed to be used alone or with other cellulite therapies. Many of the ingredients in this unique formula have been subject to peer reviewed double-blind studies in major centers around the world and have been shown to reduce the physical appearance of cellulite, circumference of hips, abdomen and thighs, reduce external dimpling and visibly increase skin smoothness and firmness. CellaDermRx is for professional distribution only and comes with a 100% money back guarantee.

**Veda Life Sciences: 800-788-5604 or visit [www.vedalifesciences.com](http://www.vedalifesciences.com)**

**Profect Photography Systems**

Profect™ Facial Studio and Full Body Photography Systems take highly detailed, reproducible photographs using Ultra-II software, a simple and intuitive interface that incorporates storage, annotation and presentation tools. The Facial Studio features professional lighting and integrated ultraviolet flashes; the Full Body produces vivid head-to-toe or partial portrait images with its unique parabolic strobe and diffuser design. Profect systems provide physicians an affordable, turnkey solution for seeing, storing and displaying the true condition of their patients' skin.

**Profect: 800-774-7630 or visit [www.profectmedical.com](http://www.profectmedical.com)**

**Ultrawave III**

Quanta System S.p.A., an internationally recognized Italian designer and manufacturer of laser systems, proudly introduces the Ultrawave III, a multi-wavelength laser for dermatological and aesthetic medicine. Offering three different wavelengths (532 nm KTP, 755 nm alexandrite and 1064 nm Nd:YAG), the Ultrawave III can safely and effectively treat a broader range of indications than any other competitive system currently on the market. An extremely powerful system, the Ultrawave III allows the use of large spot sizes at effective fluences, making treatments fast and efficient.

**Quanta System: 949-215-2622 or visit [www.quantasystem.com](http://www.quantasystem.com)**

**ArTek Devices**

ThermoTek, Inc., a leader in solid state cooling technology, proudly presents the ArTek Spot™ and the ArTek Air™. The ArTek Spot™ contact cooling device is effective at dermal cooling before and after light based treatments. The ArTek Air™ is a compact air cooling device to augment laser and light based aesthetic procedures. We believe these devices would be an ideal compliment to lasers, pulsed light treatments, tattoo removal and injections.

**ThermoTek, Inc.: 877-242-3232 or visit [www.thermotekusa.com](http://www.thermotekusa.com)**

**Fraxel re:pair**

Reliant Technologies is the innovative company behind the Fraxel® platform of lasers. Newly released, FDA cleared Fraxel re:pair™ lasers represent a new treatment paradigm. Built by the same company that pioneered non-ablative fractional laser treatment with the Fraxel re:store™ laser and Fraxel re:fine™ laser, the Fraxel re:pair laser is an entirely new CO<sub>2</sub> laser, combining the efficacy of traditional ablative procedures with the safety of a fractional treatment modality.

**Reliant: 888-437-2935 or visit [www.reliant-tech.com](http://www.reliant-tech.com)**

**LightPod Lasers**

Aerolase™ manufactures the innovative family of LightPod® aesthetic lasers that are portable, powerful and pain free. The LightPod Neo™ 1064 nm laser is for pain free hair removal on all skin types, photorejuvenation with skin tightening, vascular lesions, tattoo reduction and many other medical and aesthetic applications. The LightPod Era™ 2940 nm laser is for laser peels, gentle resurfacing, acne scar reduction and lesion removal. All LightPod lasers are maintenance free with no costly disposables or service calls required.

**Aerolase: 877-379-2435 or visit [www.aerolase.com](http://www.aerolase.com)**

**GentleMax**

Candela introduces the new GentleMax™, an integrated aesthetic treatment system with the GentleFacial™ approach to skin rejuvenation, reducing diffuse redness and pigmentation. See the difference that Candela can deliver. One system – unlimited potential.

**Candela: 800-668-2691 or visit [www.gentlemax.com](http://www.gentlemax.com)**

**Isolaz System**

The Aesthera Isolaz System developed by Aesthera Corporation, is powered by Photopneumatic technology, a breakthrough patented technology that innovatively combines the unique properties of broadband light with pneumatic energy. Photopneumatic Therapy (Isolaz) is five times more efficient in delivering photons to dermal and epidermal targets. No pain, Isolaz treatments are safe, effective and require no pre-treatment with anesthetics. Isolaz treats legs and backs in 15 – 20 minutes. Initial applications include, hair removal, skin rejuvenation, treatment of vascular and pigmented lesions as well as leg veins.

**Aesthera: 877-275-4779 or visit [www.aesthera.com](http://www.aesthera.com) or [www.isolaz.com](http://www.isolaz.com)**

**Mashup Solution**

Asclepion presents the Mashup Solution allowing doctors to perform a wider range of treatments with a single and innovative device. Made in Germany, Asclepion technology offers additional modules such as radiofrequency (for skin tightening and wrinkle reduction), acoustic waves (for cellulite and body shaping) and pulsed light (for vascular lesions, hair removal, acne and skin rejuvenation). New Asclepion devices ensure more flexibility and the best investment option for every medical practice.

**Asclepion Technologies: +49 3641 77 00 100 or visit [www.asclepion.com](http://www.asclepion.com)**

**Harmony**

The Harmony multi-application system combines nine technologies (12 modules) into one unit: 1. Advanced Fluorescence Technology (AFT) – light-based technology for skin treatments including: skin rejuvenation, vascular/pigmented lesions, hair removal and acne. 2. Near-infrared – skin tightening. 3. Pulsed UVB – restoration of lost pigment and psoriasis. 4. Long pulsed Nd:YAG – treatment of facial wrinkles, deeper and reticular leg veins. 5. Q-switched Nd:YAG – treatment of tattoos and dermal pigmented lesions. 6. FD Q-switched – tattoo removal. 7. 1320 Nd:YAG – wrinkle and acne scars. 8. 2940 nm Er:YAG – laser peel and skin resurfacing. 9. Pixel 2940 – fractional ablative skin rejuvenation.

**Alma Lasers: 224-377-2000 or visit [www.almalasers.com](http://www.almalasers.com)**

**Duette**

Parisian Peel® introduces the Duette, combining micro-dermabrasion and patented DiamondTome™ crystal-free skin resurfacing. The Duette offers the flexibility to switch between using crystals and DiamondTome wands. Featuring the best from Parisian Peel: proprietary handpiece, self-contained waste canisters, triple HEPA filtration and a dehumidification system for clog-free operation. From DiamondTome: multiple diamond-tipped treatment wands in varying coarseness, HEPA filtration and clog-free operation.

**Aesthetic Technologies: 800-262-4412 or visit [www.parisianpeel.com](http://www.parisianpeel.com)**

**VIVITÉ**

VIVITÉ™ is an advanced skincare routine developed by Allergan. VIVITÉ skincare formulations are based on exclusive GLX Technology™, a formula matrix that acts as a catalyst for the deepest penetration of glycolic acid, bound with natural antioxidants. No other skincare system offers this versatile component. Unique formulations that maximize its anti-aging benefits include VIVITÉ Daily Facial Cleanser, Exfoliating Facial Cleanser, Daily Antioxidant Facial Serum, Night Renewal Facial Cream and Revitalizing Eye Cream.

Allergan: 800-377-7790 or visit [www.viviteskincare.com](http://www.viviteskincare.com)

**Revâge 670**

The Revâge 670 is a diode laser system comprised of 30, 4 milliwatt individual diodes fitted into a canopy that rotates within an inner liner to deliver 120 milliwatts of energy to tissue. The patented technology is part of an emerging technology field called Low Level Laser Therapy or LLLT. A proprietary rotational technique is employed to irradiate the scalp of patients who suffer from various forms of Alopecia and poor hair quality, in a non-thermal mode. An initial therapeutic regime is 22 weeks.

APIRA: 866-98-APIRA or visit [www.apirascience.com](http://www.apirascience.com)

**EVOLENCE**

EVOLENCE®, a dermal filler that restores shape to facial wrinkles, is an injectable gel requiring no pre-tests in advance to injection. EVOLENCE sets new standards in natural biodegradable fillers with effects lasting at least 12 months. EVOLENCE is approved for sale in Europe through CE mark, as well as in Canada and Israel. The EVOLENCE product line is being extended with additional products to provide physicians with flexibility in treating lines and wrinkles, adding lip fullness, facial contours and correcting deep folds. The first of these extensions, EVOLENCE® Breeze™, is already approved for sale in Europe through CE mark and in Canada.

ColBar LifeScience Ltd.: 800-933-3387 or visit [www.evotence.com](http://www.evotence.com)

**Pearl**

Cutera debuts Pearl™ with YSGG technology, an FDA cleared 2790 nm laser for the treatment of wrinkles, uneven texture, discoloration and mild acne scarring. Patients desire aggressive treatment for facial lines and texture without the lengthy downtime of traditional ablative procedures. Pearl provides this optimal balance between cosmetic benefit and patient downtime. During treatment, a portion of the epidermis is removed and there is simultaneous thermal injury to all or part of the remaining epidermis. Creating a natural protective dressing on the skin minimizes downtime during the restorative process. Pearl is available on the multi-application Xeo, as an upgrade to all existing customers, and as a stand-alone unit.

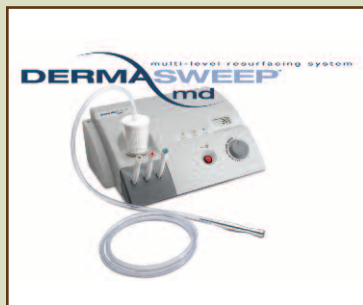

Cutera: 888-4Cutera or visit [www.cutera.com](http://www.cutera.com)

**VECTRA 3D**

Bring the next dimension of medical imaging accuracy and ease to your practice with the VECTRA 3D surface imaging system from Canfield. Using the most advanced 3D imaging technology available today, VECTRA 3D combines powerful measurement tools and fast capture time with ultra high resolution, ten megapixel imaging. Add to that Canfield's standard setting Mirror® software for seamlessly integrated patient and image management and you have the ideal solution for evidence-based image planning, analysis and communication.

Canfield Imaging Systems: 800-815-4330 or visit [www.canfieldsci.com](http://www.canfieldsci.com)

**DermaSweep MD**

The DermaSweep MD™ multi-level resurfacing system uses particle-free technology combining precision exfoliation, topical skin specific solutions and vacuum pressure to adjust to individual skincare needs. Offering three treatment levels: microdermabrasion, epi-infused microdermabrasion and hydro-assisted dermabrasion; the DermaSweep is ideal for treating early aging, lines, hyperpigmentation, photodamage, acne, surgical scars, dehydration, uneven skin texture, pre-PDT and improving overall skin health. It's backed by unsurpassed customer support and training.

DermaSweep: 916-772-9134 or visit [www.dermasweep.com](http://www.dermasweep.com)

**Affirm**

Cynosure introduces the Affirm combined fractional laser system, with exclusive mid-infrared Combined Apex Pulse (CAP), Multiplex and Xenon Pulsed Light (XPL) technology. Affirm stimulates collagen remodeling and production with precise thermal manipulation of the epidermal and dermal tissue and treats wrinkles, pigmentation, facial telangiectasis and rosacea. CAP technology makes treatment easier, faster and more effective than competing protocols. There is no use of topical anesthetic, messy gels or dyes thereby increasing patient throughput. Multiplex technology combines deep and shallow collagen remodeling treatments to target multiple skin conditions in one session. When combined with the SmartCool air cooling system, the treatment is virtually painless.

**Cynosure: 800-886-2966 or visit [www.cynosure.com](http://www.cynosure.com)**

**CT3PLUS**

The new CoolTouch CT3PLUS™ 1320 nm laser system features the CoolTouch gold standard CT3 laser system plus a new painless CoolBreeze™ skin tightening treatment mode. The CT3PLUS features the 1320 nm wavelength to penetrate upper to deep dermal tissue, thermal feedback for a CoolBreeze treatment and pre-, mid- and post-cryogen cooling for patient comfort and safety. The CT3PLUS laser is the ideal non-ablative treatment for acne, acne scars and wrinkle reduction with no patient downtime.

**CoolTouch: 877-858-2665 or visit [www.cooltouch.com](http://www.cooltouch.com)**

**Zcaine and Zcalm**

Creative Technologies is an innovative and trusted leader in manufacturing and distributing specialty products for the aesthetic industry. All products are safe, competitively priced and FDA compliant. Zcaine™ - Fast Acting OTC Analgesic Gel combines the power of lidocaine and other proprietary ingredients to provide superior numbing and a refreshing, soothing sensation to deliver quick pain relief that begins working on contact. Zcalm™ - Post Laser Revitalizing Cream combines botanicals, Pro-Elements™ and menthol to soothe, calm and rejuvenate laser treated skin.

**Creative Technologies, Inc.: 757-436-4774 or visit [www.CreativeInc.biz](http://www.CreativeInc.biz)**

**DermaWave No-Needle Mesotherapy System**

DermaWave Mesotherapy Systems offers its No-Needle Mesotherapy System™ to address a variety of aesthetic applications including body recontouring. Treatment options include cellulite reduction, facial skin rejuvenation and an application known as DermaDissolve™. Recent radioisotope studies confirm that the device penetrates prescribed medication more evenly to the same level as the injection technique while avoiding unpleasant downsides for patients. Copies of studies, the full clinical package and DVD are available.

**DermaWave: 866-769-3011 or visit [www.dermawaveusa.com](http://www.dermawaveusa.com)**

**C-Sculpt**

DermaMed International, Inc. introduces C-Sculpt cellulite treatment system which utilizes LED, cooling and massage for the treatment of cellulite, skin tightening, toning and body sculpting. C-Sculpt stimulates microcirculation and promotes lymphatic drainage while dramatically reducing the appearance of cellulite and is easy on the technician and relaxing for the patient.

**DermaMed International: 888-789-6342 or visit [www.DermaMedIntl.com](http://www.DermaMedIntl.com)**

**RevLite**

The RevLite™ Electro-Optic (EO) Q-switched Nd:YAG features PhotoAcoustic Technology Pulse (PTP), designed to provide safe, effective treatments at higher energy levels than traditional lasers. The EO Q-switch provides an extremely high-speed shutter to produce nanosecond pulse durations. High-speed repetition rates of PTP produce maximum energy output over a large spot size at the same fluence level, enabling physicians to treat large areas effectively and rapidly. FDA cleared for all skin types and for a variety of indications, including skin resurfacing, wrinkles, hair removal, acne scars, tattoo removal and treatment of vascular and pigmented lesions.

**HOYA ConBio: 800-532-1064 or visit [www.conbio.com](http://www.conbio.com)**

**SmoothShapes**

Introducing SmoothShapes™ with Photomology™, a groundbreaking advance in cellulite treatment. The proprietary Photomology technology combines dynamic energy (laser and light) with mechanical manipulation (contoured rollers and vacuum) to impact the causes of cellulite. SmoothShapes restores normal cell activity achieving tighter, smoother looking skin. Reshape the way you view cellulite treatments.

Elemé Medical: 877-333-5306 or visit [www.smoothshapes.com](http://www.smoothshapes.com)

**HairMax LaserComb**

FDA cleared HairMax LaserComb laser phototherapy device promotes hair regrowth in males with androgenetic alopecia. A double-blind clinical trial, conducted to support the FDA submission, demonstrated an increase in terminal hair density (+19.80 cm<sup>2</sup>) over subjects in a sham group (-7.60 cm<sup>2</sup>) after six months. There were no reports of adverse events during the trial.

Lexington International: 516-417-0200 or visit [www.hairmax.com](http://www.hairmax.com)

**Ellipse Flex PPT**

Ellipse Flex PPT offers hair removal, wrinkle reduction, photorejuvenation, treatment of vascular and pigmented lesions and inflammatory acne. It uses simple treatment parameters while built-in dual mode filtering and Square Pulse Technology maximize efficacy and safety. Flex PPT works in three modes: Normal — using clinically proven pulse settings; Expert — allowing experienced users to optimize pulse trains and pulse definition mode — to create and save new pulse types, pushing the boundaries of intense pulsed light treatment.

Ellipse, Inc.: 877-Ellips1 or visit [www.ellipse.org](http://www.ellipse.org)

**iPulse i400**

The iPulse™ i400 combines advanced IPL technology with striking design and versatility. Special features include a video touch screen with sound. Its patented constant spectrum of light and unique square pulse delivery are more energy efficient and achieve long lasting results in hair removal, skin rejuvenation, treatment of pigmented/vascular lesions and acne. The 8.9 cm<sup>2</sup> constant spectrum treatment head rapidly treats large areas with less discomfort. The mini glass filter is available for smaller areas. Settings are pre-programmed for easy use.

Med-Aesthetic Solutions: 760-942-8815 or visit [www.medaestheticsolutions.com](http://www.medaestheticsolutions.com)

**MiXto SX**

By combining the acknowledged gold standard 10.6 μm wavelength for skin renewal procedures with a high speed scanner, the MiXto SX was born. A truly revolutionary product in the medical laser world, using a proprietary algorithm, MiXto SX delivers, in fractional mode, a precise matrix of microspots that penetrate to the dermis and stimulate the formation of new collagen. At the same time, immediate shrinkage of damaged tissue is achieved. This patent pending fractional methodology produces a calculated tissue thermal relaxation time resulting in a faster healing process with less pain.

LASERING<sup>USA</sup>: 866-471-0469 or visit [www.laseringusa.com](http://www.laseringusa.com)

Before Tx

After Tx

**UltraPulse Encore**

UltraPulse Encore has grown to include the complete Bridge Therapy family of fractional CO<sub>2</sub> treatments. PigmentFX, ActiveFX, DeepFX and TotalFX are performed in a single treatment with only a few days of downtime. During treatment, only a fraction of the skin's surface is treated, leaving small bridges of skin untouched. This technique promotes faster healing and enables patients to return to their normal lifestyle sooner. The combination of fractional delivery and CO<sub>2</sub> makes for exceptional wrinkle and pigmentation results.

Lumenis: 877-LUMENIS or visit [www.lumenis.com](http://www.lumenis.com)

**Ultrapeel Transderm Ionto System**

Mattioli Engineering's Ultrapeel Transderm Ionto® System is the only needles free injection system, allowing medical operators to transdermally deliver both small and large sized molecules into the body without any side effects. The system uses an Ultrapeel® micro-dermabrader to gently exfoliate the skin, preparing it to receive the drug through the Transderm Ionto System probe. On physician's indication, many drugs and compounds may be used for a variety of applications. The Ultrapeel Transderm Ionto System is FDA cleared as an alternative to injections.

Mattioli Engineering: 877-628-8364 or visit [www.matteng.com](http://www.matteng.com)

**Milesman Premium**

Milesman Premium is approved and certified as providing some of the best results by the international scientific community. Effectively absorbed by the hair melanin it offers excellent results even in tan and dark skin. It features sufficient energy to destroy the hair without damaging surrounding tissue, which leads to decreased patient discomfort. This laser produces three shots per second even in high fluences allowing treatment of large areas in a short amount of time. Milesman Premium provides higher technology at a lower cost and offers decreased maintenance costs and a lower risk of breakdowns.

Milesman: +34 902 02 03 07 or visit [www.milesman.com](http://www.milesman.com)

**OmniLux**

OmniLux Professional LED systems offer single platform technology with the versatility of multiple treatment heads that are wavelength specific for the treatment of acne, periorbital wrinkles, skin rejuvenation, wound healing, psoriasis and photodynamic therapy. OmniLux Clear-U and New-U, the latest offering from Photo Therapeutics, Inc., are light, portable home-use devices that easily fit in the palm of your hand, yet deliver similar parameters to the professional model. OmniLux systems, based on a matrix of LEDs, ensure the right dose, wavelength and intensity are delivered to the target tissue to induce efficient tissue response.

Photo Therapeutics: 800-743-8150 or visit [www.phototherapeutics.com](http://www.phototherapeutics.com)

**Medi-Peels Youth Recovery Peel**

Medicalia Clinical Skincare offers Youth Recovery Peel, a radical answer for sun damaged, photo-aged skin. L+ lactic acid, glycolic acid and salicylic acid combine to dissolve and desquamate skin surface cells by diminishing corneocyte cohesion. Your patient's skin emerges radiant and hydrated due to the increase in dermal glycosaminoglycans and mucopolysaccharides. Skin appears resurfaced with tighter pores and reduced wrinkles. Challenging hyperpigmentation appears lighter, with increased surface elasticity and a smoothing of scars. Help patients reveal a younger, healthier skin with this excellent anti-aging peel.

Medicalia: 866-314-1975 or visit [medicalia.com](http://medicalia.com)

**Neova Manganese Skin Brightening Serum**

Procyte, a PhotoMedex Company introduces its Neova Manganese Skin Brightening Serum, which has been clinically shown to reduce the appearance of hyperpigmentation and age spots; and improve the appearance of mottled hyperpigmentation, sallowness, lentigines and surface roughness. This lightweight, non-irritating, antioxidant rich serum significantly improved the appearance of hyperpigmentation and photo-aging in 12 weeks.

Procyte – A PhotoMedex Company: 888-966-1010 or visit: [www.procyte.com](http://www.procyte.com)

**LaserShields**

NoIR LaserShields provide industry defining protection and visibility with an eye on comfort. With the #34 frame featuring a detachable Rx insert, in addition to ten other frame options, LaserShields have become the point where safety and comfort converge. NoIR offers higher optical densities, L-ratings and visible light transmittance in more frame styles than the competition, making LaserShields the best laser eye protection choice.

NoIR Laser Company: 800-521-9746 or visit [www.noirlaser.com](http://www.noirlaser.com)
